-

WORK EXPERIENCE

IT SUPPORT EXECUTIVE

Nov 2023 – Present

Enduro Supply
Dubai, UAE

- Architect, develop, and maintain advanced Shopify & Shopify Plus themes using Liquid, JavaScript, HTML, CSS with scalable, component based design.
- Engineer high performance landing pages, product templates, and reusable theme sections optimized for conversion, mobile first UX, and multi brand consistency.
- Lead performance optimization initiatives like lazy loading, image pipelines, asset minimization, theme refactoring & improving core web vitals and reducing load times across multiple stores.
- Build complex features using Shopify Admin, Ajax, and Storefront APIs, including dynamic product logic, custom cart & checkout behaviors, and third-party integrations.
- Architect scalable metafields driven systems to power dynamic content & product layouts.
- Design and manage full Shopify store configurations: collections, metafields architecture, product structures, variant logic, automated workflows, shipping profiles, and payment logic.
- Resolve high impact issues involving Liquid conflicts, JavaScript errors, API failures, app incompatibilities, and checkout level bugs across 4+ active Shopify stores.
- Integrate and maintain a broader digital ecosystem Wix, Webflow, and Laravel for developing API connections, automation flows, and business tools.
- Oversee IT operations for 100+ employees, including Google Workspace, Microsoft 365, device management & IT security.

WEB DEVELOPER

Mar 2022 – Oct 2023

Fishfee Platform LLC
Ohio, USA (Remote)

- Built and maintained a full stack web platform using Agile practices, optimizing MySQL queries to improve performance and scalability.
- Developed and documented RESTful APIs, integrating Google Distance Matrix for live delivery fee calculation and implementing real-time tracking via Firebase FCM and WebSockets.
- Implemented secure payment flows with Stripe and U.S. Bank, including driver onboarding through Stripe Identity Verification and Stripe Connect for compliant payouts.
- Improved platform stability and security using code reviews, Git best practices, OAuth, rate limiting, and audit logging; enabling successful approval in bank level API audits.

KEY PROJECTS

SHOPIFY WEBSITES

<https://trisouq.com>
<https://roarsome.ae>
<https://ventumracing-me.com>
<https://cariuma.ae>

- Reduced product returns by 37% by engineering a custom size converter system for trisouq.com and improving the checkout flow across all Shopify stores.
- Developed a UAE compliant invoicing application featuring multiple templates, branded themes, and automated email delivery for multi store operations.
- Decreased cart abandonment by 22% by building an internal Slack automation that alerts the CS team in real time to re-engage high value customers.
- Ensured accurate multi-store inventory synchronization by integrating Shopify with Cin7 Core and optimizing product SKU.

WIX & WEBFLOW

<https://endurosupply.com>
<https://beyondtheragingsea.com>
<https://factorthirtyone.com>

- Designed and maintained company websites; collaborating with Marketing, Business Development, and Brand teams to deliver clean, functional, and on brand pages.
- Developed internal use pages integrated with Zoho Desk and Zoho CRM to support warranty management and vendor workflows.
- Ensured consistent site updates, asset management, and smooth cross-team communication for timely website releases.

EDUCATION

Bachelor of Science in Computer Science & Engineering

Premier University, Chittagong, Bangladesh
Passing Year: 2020
